DAISI Education

Data, Analysis and Insight for School Improvement

We are a team of expert analysts passionate about turning data into meaningful insight so your pupils can realise their potential.

DAISI Education was founded in 2011 supplying bespoke analysis to schools in the City of Nottingham. We have now grown nationally and more and more individual Schools, Academies, Trusts, Federations and Local Authorities now trust us with their data needs.

We firmly believe

Every School is

INDIVIDUAL

& needs personalised insight

Every Pupil is

IMPORTANT

& deserves true attention

Every Trust/Federation is

DISTINCTIVE

& requires bespoke detail

Every Report is

UNIQUE

& Tailor-made

We make analysis easy giving clear and insightful reports that help make the marginal gains to improve school results. We offer a full year-round service and every penny we create is put straight back into education.

As a traded service out of Nottingham City Council, we work with every school and academy within the city and support headteachers and school leaders nationally to understand and manage their data. Our reporting also serves Local Authority officers and Education Improvement Boards with the intelligence needed to inform strategic dialogue and direction.

In 2019, we were also recognised as a 'world class supplier' for our work with outstanding schools by the world schools network – further proof of that our attention to detail and focussed data analysis is continuing to make a difference across the country.

We believe that each school requires a personalised solution to their data needs and offer timely, unique and tailor-made reports.
