

Bespoke Group Orders

Thank you for your interest in a DAISI Education Group Order.

Every one of our individual analysis reports can be purchased together in a bespoke package tailored to your needs. By ordering them as a group, you create a uniform picture that provides comprehensive insights.

**Personalised and Detailed Analysis for every Headteacher
plus a FREE Summary Report for Assessment Leads.**

DAISI Education
Data, Analysis and Insight for School Improvement

Bespoke Group Orders

Thank you for your interest in a DAISI Education Group Order.

Every one of our individual analysis reports can be purchased together in a bespoke package tailored to your needs. By ordering them as a group, you create a uniform picture that provides comprehensive insights, personalised for every headteacher.

This is a full description of how that process works.

Initial Conversation

1. We want to understand what you are looking for as this will drive our analysis. Are you looking for a deep dive into a certain subject or a forensic overview of selected schools? We do not offer a one-size-fits-all approach. Our analysis can be tailored to your needs to enable you to get the most out of the analysis reports received. This could be in person (over teams) or via email.

Bespoke Quotation produced

2. We will create a quotation based on this conversation, so everything is explained and up to date. This will give a clear guide to the price per school and how the arrangement with yourself will work. This price per school will remain fixed but if you want to add or remove schools from the list, we can accommodate this.

Order Confirmed and Processed

3. If you are happy to proceed, you will then need to complete the order form – which includes the purchase order and data agreement – to enable processing of the order. This is for GDPR permission as you will receive the aggregated summary report and also provide a secure password for analysis transfer when this is created.

School List provided

4. At this point, we will also need a full list of school /academy name, DFE number and a contact email (usually headteacher) to complete the order and to initialise the next stage of the process.

First Contact asking for data permission

5. Once this is received, we will email all the schools/academies on your behalf asking them to complete their bespoke order form. This is for GDPR permissions and for them to create a secure password for the analysis transfer when complete. We will continue to monitor this list letting you know who has replied and who needs chasing. We are happy to chase also.

Data Requested from schools

6. We will also contact schools and send in the data required. Full instructions will be provided both about how to access and provide the data in question and also to send it to us securely. We are used to dealing with a large number of orders. Once again, we will continue to monitor the list to guarantee all schools reply and send in data. We will let you know updates throughout the process.

Data Received - Analysis created

7. Once data received, we will create a personalised analysis for each individual school/academy and send it back direct to them. All analysis will be sent via secure email (using the password provided by each school in their permission form). We aim to produce each one within 3 days of receipt of data. Each one of the individual school/academy reports can also be sent to yourselves on request.

High Level Summary Report created

8. Once all data received, we will then collate all the results into a FREE summary report for you enabling you to look across all areas of your cohort selection and create interventions based on common trends/needs and hard evidence. It also provides comparisons between each school and clear averages across the whole cohort. This analysis will be sent to you via secure email (using the password provided in your original permission form).

For any further information, please contact Mark Attwood on 0115 876 2655
or email mark.attwood@nottinghamcity.gov.uk.

Feedback from Previous Group Orders

“The reports are excellent and were really helpful. The detail and narrative were exactly what we need, and we will certainly be using DAISI again. The service has been excellent and the speed they were put together was fantastic so thank you I am really grateful.”

DRB Ignite Multi Academy Trust

“I just wanted to say thank you for turning around the DAISI reports so quickly – it is very much appreciated. These reports are so thorough and useful - I am sure they will be key in informing the focus area's for this year improvement plans.”

Peterborough Keys Academy Trust

“From the outset, working with the DAISI team has been a positive experience. They are responsive to the needs of the authority. Schools have been very impressed with the quality and content of the reports. The presentation of information is very comprehensive and easy to access at various levels, whether you want an overview or more detailed understanding of performance.

Data, Analysis and Insight for School Improvement

Question Level Analysis

Question Level Analysis breaks assessment data down into meaningful insight – looking instead at topics or cohorts rather than individual answers. This aggregation allows you to see patterns emerging which can be the drivers to implement change.

Our QLA is based around the KS2 SATs.

Primary

The [KS2 SATs Results](#) provide standardised, independently marked insights into student strengths and weaknesses, with results broken down by individual questions. Our Question Level Analysis aggregates this assessment data by topics and cohorts revealing patterns that can drive meaningful change across your school.

Our [Year 6 Maths Baseline](#), for end of Year 5 or start of Year 6, identifies key gaps and prioritises future actions. It uses questions from the 2019 SATs papers, focusing on the Year 3, Year 4, and Year 5 curriculum. No material due to be covered in Year 6 is included in the assessment.

Our [Mock SATs Analysis](#) Reports bring you full insight into every topic, question type and more with graphs and statements to guide interventions and classroom teaching plus Individual pupil profiles that really help in identifying specific areas where each child might need extra support.

Our [OneHourMaths](#) papers cover the entire KS2 Curriculum using carefully selected questions from past SATs papers. This ensures every topic is tested and various question types are included, providing comprehensive analysis similar to all three Mathematics papers.

“Analysis from DAISI Education seriously helps to reduce the workload for senior leaders. We love the detail of the data analysis – it covers everything that you need, including individual pupil and cohort progress. It’s so easy to access and provides excellent value for money. In summary, I was really impressed by the quality of the resources they have on offer.”

Headteacher Chat

Secondary

[Our Transition Pack](#) takes the KS2 SATs scores of your new cohort and transforms this data into summary reports and pupil profiles developed with input from educators and designed for Ofsted, departmental heads, and class teachers. It enables you to provide targeted support early, close learning gaps and ensure all your new pupils are ready for the Key Stage 3 curriculum.

[Our Year 7 Maths Baseline](#) covers the entire KS2 curriculum in an hour-long paper, providing a comprehensive overview of student performance across all topics and question types. This efficient approach – using selected questions from the 2019 SATs paper, ensures you get a detailed understanding of strengths and weaknesses in a short amount of time.
